

GCubed, Inc.

Internship Program

The GCubed internship program offers access to its talented workforce and exposure to various fields in both the corporate and government contract environments. Interns gain exceptional on-the-job experience, as well as opportunities for future employment with GCubed that may lead to a security clearance.

Types of Internships

Corporate - Interns are exposed to a variety of tasks in different departments to include, but not limited to, administrative function, IT duties, business development processes, proposal processes, and operational procedures. Interns can also expect to learn about some of our finance and human resources processes.

Contract - When on site at a government facility, tasks and workload are determined by the customer. However, the desired expectation is that interns will have access to a variety of different IT areas and experts. Interns are expected to have a Security+ certification to be considered and must complete at least one computing environment training course through the SkillPort training system while working on site.

Benefits

- Hourly salary
- Professional mentorship and career guidance
- Professional references
- Training and volunteer experience
- Potential job opportunities

Security Clearance

Our internships provide the opportunity to potentially acquire a security clearance; a requirement for work on some government contracts. Within 30 days, all IT Interns will complete an Individual Development Plan (IDP) that will be used for during their 90 Day Assessment to track progress. At the 90 Day Assessment, a determination will be made if Intern should be considered for Security Clearance. For potential IT interns, preference will be given to individuals with current IT certifications. All candidates must be eligible to receive a US government security clearance. Standard Form 86, the Questionnaire for National Security Positions, will need to be successfully filed by the selected candidate.

Period of Performance

Typically, internships run from June through September, although timing varies based on the needs of the intern, the government customer, and GCubed. If an intern is available during winter break, arrangements can be made for the intern to be on site at that time, again, based on the needs of the intern, the government customer, and GCubed.

Application Process

All applicants must submit the following:

- Internship application
- Resume
- Self-Assessment and 7 Soft Skills Assessment

Submit your application by responding to a job opening on our website or contacting us at info@gcubedinc.com.
