Mission Support & Professional Service Solutions

GCubed delivers distinctive, mission-critical, technology-based capabilities relevant to the most difficult and enduring customer challenges.

Program and Risk Management	The right mix of planning, monitoring, and controlling can make the difference in completing a project on time, on budget, and with high quality results. Our outstanding Project Managers are CMMI, PMI, and ITIL certified. They are leaders and team players who exhibit collaborative leadership skills like negotiation, agility, and strategy every day.
Enterprise Information Technology	GCubed provides enterprise level data center support including information assurance, NIPR and SIPR support, tier-one through three service desk operations support, service desk touch labor support, service desk administration and information assurance support. Enterprise IT and cybersecurity services are provided to Center for Army Analysis, Joint Service Provider (Pentagon), Washington Headquarters Services.
Counterintelligence, CI-Cyber, and Insider Threat	We support the Defense Counterintelligence and Security Agency (DCSA) with senior level Counterintelligence (CI), HUMINT, Insider Threat (InT) and CI-CYBER subject matter experts who provide direct support to virtually every aspect of the DCSA CI, CI-Cyber, and Insider Threat mission, to include CI Incident Assessment, Policy, Collection, Analysis, Other Government Agency Counterpart Engagement and Production
Cybersecurity	Understanding the current operating environments of government agencies and private sectors; we leverage mature capabilities and industry best practices to improve Security processes and procedures to reasonably mitigate risk. Our past performance and thorough understanding of FedRAMP and NIST 800-53 r4 Risk Management Framework has allowed us to be successful in development of Cyber operations and strategies to focus collection efforts on priority threats to the network and its resources. This includes BCP/COOP/DRP planning
Web Collaboration Services	We supported the Rapid Web Development initiative under the WHS Enterprise Information Technology Services Directorate (EITSD) which focused on creating a “One Stop Shop” for all of EITSD web service requirements utilizing Amazon Web Services.

Program & Risk Management

Program Management

- Demonstrated outstanding performance providing supervision and guidance for Program personnel.
- Responsible for all aspects of program performance to include technical, contractual and administrative, including managing and supervising personnel.
- Proven record for overseeing the successful completion of all tasks.

Risk Management

- Risk management is a continuous effort that starts prior to the commencement of work. GCubed's management staff meets weekly to review test activities in progress or planned and their corresponding risks.
- Following the risk management standard process shown below we will maintain an Active Risk (AR) database with risks cataloged and ranked in terms of potential severity and the vulnerability of the assignment to experience that risk.

Enterprise Information Technology

- **Enterprise IT Solutions**
  - Enterprise IT Management
  - Enterprise-wide Implementation & Support Services
  - Cyber Operations
- **Network Engineering & Administration**
  - Network Design
  - Firewall Configuration
  - Virtualization
  - Hosting
  - Hardware Design/Configuration
- **Enterprise Network Help Desk Support**
- **Information Assurance**
  - DIACAP/DITSCAP/NIST RMF Policy and Guidance
  - Certification & Accreditation
  - Authority to Connect/Authority to Operate
  - Compliance Assessments & Support
- **Web Site/Portal Design, Hosting, Maintenance**
- **Cabling/Fiber Optics**
- **Asset Management/ERP System Implementation**
- **Training**
- **Operation & Maintenance**

1. Operations & Maintenance (O&M)	Implements a Cohesive Operations and Maintenance Program to address customer Enterprise Requirements
2. Application Development, Engineering, & Sustainment (ADES)	Utilizing Dev OPS, Waterfall, and Agile development approaches to build effective, efficient, and secure applications.
3. Hardware BPAs	• Support Centralized IT Asset Management Program for acquiring all IT assets
4. IT Security	• ISSO Support • Assessment & Authorization Services • Security Operations Center (SOC) • Emerging Technology & Modernization Support
5. Mission Needs & Requirements	• Cohesive management of planning tasks (requirements, business case analysis, operational support plan, enterprise code library management, validation & integration of security, technical standards, configuration management, determine development/solution method)
6. IT Program Management Services	• Skilled IT Project Managers (modern project types) • Project Services (Risk Adjusted CBA, Integrated Master Schedule dev. & mgmt., operational analysis, cost estimation, life cycle support services, etc.) • Vendor & Service Management • Enterprise Architecture • Capital Planning & Investment Control
7. Independent Verification & Validation (IV&V)	Supporting the Risk Management Framework

Counterintelligence

Operations Assessment Group
Identifies and responds to the most significant events, vulnerabilities, trends, and policy gaps involving the National Industrial Security Program and U.S. Government personnel holding security clearances.

Collection
Ensures DCSA CI collection and reporting meets National and DoD requirements, and actionable information is promptly referred to the appropriate Intelligence or Law Enforcement community counterparts in compliance with intelligence oversight rules and regulations.

Counterintelligence Training
Introduction to CI Course (ICIC) to familiarize the entire DCSA workforce to DCSA's mission.

Subject Matter Experts
GCubed Subject Matters provide decades long experience in the Law Enforcement, CI and Intelligence communities; and provide direct support to the DCSA CI, CI-Cyber and InT missions, to include the DCSA Operations Assessment Group, the Counter Espionage Branch, the CI-Cyber Division, the CI Partnership with Cleared Industry Division, Liaison Branch, the DoD Insider Threat Management and Analysis Center, the Vetting Risk Operations Center and the DoD Central Adjudication.

CI – Cyber
The DCSA CI-Cyber Division employs advanced tools, collection and analysis to identify and counter foreign intelligence entity cyber threats to cleared persons and cleared industry.

Cybersecurity

Our cybersecurity services give you the confidence to securely operate your business with partners, customers, and suppliers.

Strategic Consulting
Services to formulate an effective security strategy, including organization, governance, metrics, process, technology deployment, and meeting legal and regulatory compliance.

Managed Security Services
Confidently adopt an outside-in approach and securely embrace third-platform and disruptive trends while guarding against rapidly changing risks.

Technical Consulting
When it comes to cyber security, enterprises need to know how they stand in reality – not where their policy says they stand. Today, regulatory and compliance mandates demand it.

IT Assessments
Our proven processes and experienced security experts can help you quickly and cost-effectively certify your products to the standard required by many government and civilian agencies.

Cyber Assurance
Identifying, managing, measuring, and reporting on IT security compliance requirements through a complete end-to-end framework and program of standards, processes, and tools.

Business Continuity & Disaster Recovery
BC/DR plans are the bedrock of preparedness. For organizations, they are components of sound risk management; a means of preserving resiliency during extreme duress.

Web Collaboration Services

GCubed supported the Rapid Web Development initiative under the WHS Enterprise InformationTechnology Services Directorate (EITSD) which focused on creating a "One Stop Shop" for all of EITSD web service requirements utilizing Amazon Web Services. The project included:

- Developing a reusable System/Network Architecture and Security Architecture for the Web Center of Excellence
- Developing automation of IT system configuration in the cloud
- Providing demonstrable server platform deployment (minutes) on the AWS infrastructure
- Using cost effective website development without maintaining a separate development environment
- Initiating Enterprise System Administration/Engineering and Monitoring
- Deploying VPN dedicated access, installed cloud based HBSS, ACAS, and TA which provided a platform for the cloud CNDSP
- Providing an Information Assurance process based on the Security Requirement Guide (SRG) and FedRAMP RMF security controls
- Identifying the tools and developing successful system scans

- Program\Project Management
- Amazon Web Services
- Microsoft Azure
- Scripted Provisioning
- Cloud Migration
- Cost Model Offerings
- Web Design & Development
- Application Development
- Paas, Iaas, Saas
- 508 Compliance
- Content Management
- Systems Architecture
- System Performance Management
- Information Technology Governance
- Information Assurance
- Network Security
- Incident Management
